Career Overview

A motivated Full Stack Developer with a track record of delivering exceptional user experiences and innovative web solutions. Skilled in JavaScript, React, and Node.js, I leverage my front-end and back-end development skills to build high-performance, responsive applications. With a few years of experience, I focus on creating scalable, user-centered solutions with a keen eye for design and functionality. I thrive on solving complex technical challenges and am dedicated to enhancing user experience and driving growth through efficient, impactful applications.

Professional Skills

JavaScript, React, Node js Agile Development, Software Architecture, Responsive Design, Problem-Solving, Cross-Browser Compatibility, Accessibility Standards, Mobile-First Development, Web Performance Optimization, Git,

Employment History

Frontend Developer
Deep Technology Limited, Abuja
Key Qualifications & Responsibilities

- Developed and implemented user-focused, scalable web applications in JavaScript and React.js, with a focus on high-quality code architecture.
- Collaborated cross-functionally with backend and data teams to design and integrate APIs, performing verification testing to ensure seamless functionality.
- Developed reusable components and optimized front-end performance for scalability and maintainability.
- Regularly performed code reviews, debugging, and quality assurance to maintain code integrity and efficiency.
- Integrated performance monitoring and analytics tools to track, analyze, and enhance application health.

Frontend Developer
NetApps, Abuja — **(Contract)**
Key Qualifications & Responsibilities

- Contributed to a large-scale, data-driven web application using React.js, emphasizing responsive design and cross-browser compatibility.

- Partnered with backend teams on API integration, testing, and data handling to provide a seamless user experience.
- Leveraged Agile methodologies, participated in sprints, and led code reviews to ensure development aligned with project goals.
- Enhanced application performance, loading speed, and SEO through front-end optimization techniques and regular user testing.
